Internship

○ **Unity Developer**

Saanvika Software Solutions **(2023 - Present)**

- Acquired practical expertise using Unity3D, exploring the foundational aspects of game development and 3D modeling.

- Explored Unity3D extensively, gaining hands-on experience in developing diverse gaming projects with a focus on immersive gameplay and compelling visuals.

○ **Intern**

Highradius **(Jan 2022 - May 2022)**

- During my internship at HighRadius, I gained practical experience in machine learning by developing a B2B invoice application. Collaborating with a team, we crafted an innovative solution where a trained machine learning model predicted payment dates for invoices.

- Engaged in continuous learning and exploration of machine learning methodologies to enhance the application's predictive capabilities.

Projects

○ **Survival Shooter Game**

- Developed a third-person survival shooter game with smooth movement, versatile weapons, and intuitive UI.
- Employed character controllers, animations, and physics systems to create fluid player movement and interactions.
- Gained proficiency in Unity Engine and expanded knowledge of C# programming language through hands-on application in game development.

○ **Payment date prediction**

- Developed a ML model to predict payment dates
- Performed data preprocessing and EDA
- Split the dataset into train and test to train the ML model

Certificates

- Supervised machine Learning
- Internship certificate by High radius.
- Ignite internship completion certificate from LTIMindtree.
